

QUALITY CONTROL ENGINEER (SOFTWARE)

Location : 4535 boul. Hamel #240, Québec

OVERVIEW:

As an engineer who is passionate about software quality control, you will work closely with our engineering, operations and product management teams to ensure the stability, reliability and criticality of our research and development.

SPECIFICALLY:

Development quality control strategies, plans and testing tools

- Review product specifications
- Define electronic and software testing strategies
- Write test plans
- Develop testing tools

Carry out test plans

- Prepare progress reports
- Follow up with the design team on issues that have arisen

Collaborate in the organization's development

- Participate in meetings required for this position
- Assist work colleagues
- Collaborate to develop the organization's administrative procedures
- Keep skills and knowledge up-to-date

WE ARE LOOKING FOR A CANDIDATE WITH THE FOLLOWING PROFILE:

REQUIREMENTS:

- Bachelor's degree in Software Engineering, Computer Science, Electrical Engineering or any other relevant field
- 5 years of experience in a similar role
- Member of the Ordre des ingénieurs du Québec
- In-depth knowledge of C++, C, Python, Jira and Microsoft Office
- Experience in electronic and software testing methodologies
- Functional English
- Rigorous
- Attention to detail
- Excellent analytical skills
